

EMELIE LITWIN

UX ENGINEER / FRONTEND DEVELOPER

+46704584396 | emelielitwin@gmail.com | www.emelielitwin.com | linkedin.com/in/emelielitwin

Frontend developer with a strong UX background and experience in component-based development and design systems. I have worked in large organizations where reusable components, consistency and long-term maintainability are key. I focus on building accessible, reusable and maintainable user interfaces and work closely with UX, product and backend teams to deliver high-quality frontend solutions.

SKILLS

React – TypeScript – JavaScript – HTML/CSS – Component architecture – Accessibility (WCAG) – Design Systems – Responsive design – Code quality and testing – Cross-functional collaboration

WORK EXPERIENCE

DESIGN ENGINEER / FRONTEND DEVELOPER

Jun 2022 – Present

Scania Group / Stockholm

- Developed and maintained reusable web components and UI kit elements within the Tegel design system
- Built component-based user interfaces with a strong focus on consistency, accessibility and long-term maintainability
- Collaborated closely with designers and frontend developers to ensure seamless design-to-code workflows
- Contributed to shared patterns, documentation and best practices used across multiple product teams
- Promoted cross-functional collaboration to support scalable and high-quality frontend development

UX ENGINEER

Jun 2021 – Jun 2022

Swedish Public Employment Services / Stockholm

- Designed, implemented and documented web components for the organization's design system
- Worked with component-based UI development using StencilJS and design tooling in Sketch and Figma
- Supported product teams through workshops, onboarding and hands-on collaboration
- Contributed to improved consistency and reuse across teams by establishing shared UI patterns
- Participated in hackathons and initiatives to drive collaboration and innovation

UX DESIGNER

Apr – Sept 2020

FRISQ / Stockholm

- Designed and tested prototypes for web, tablet and mobile applications
- Conducted user research and interviews to understand user needs and workflows
- Collaborated closely with developers and product stakeholders in a healthcare context
- Translated user insights into clear design solutions and interaction flows

DESIGNER

Jan 2019 - Current

Litwins Knitwins / Stockholm

- Design and produce digital patterns and product material for an international audience
- Create clear, structured documentation and visual assets for end users
- Manage the full process from concept to published product on external platforms

UX-DESIGNER

Apr – Sept 2020

WORK EXPERIENCE – CONTINUED –

Blue Media AB / Stockholm

- Designed a mobile meditation app in collaboration with a physician and graphic designer
- Created interaction flows and visual design using Adobe XD
- Wrote detailed requirements specifications to support efficient development

REQUIREMENTS ANALYST INTERN

Jan – Jun 2018

Karolinska Hospital IT/ Stockholm

- Participated in requirements analysis within a large healthcare IT project
- Documented functional and non-functional requirements in collaboration with stakeholders
- Produced reporting requirements and visualizations for use in Tableau

SUMMER INTERN

Jun - Aug 2017

Karolinska Hospital IT/ Stockholm

- Worked with internal e-commerce tools and reporting templates
- Created visual assets and basic automation using Excel macros
- Collaborated with internal teams to support operational workflows

DIETITIAN

Aug 2013-Aug 2018

Huddinge Hospital / Stockholm

- Worked as a clinical dietitian within neonatal care
- Developed individualized nutrition plans in collaboration with medical staff
- Supported parents and trained colleagues in nutrition-related processes

EDUCATION

VOCATIONAL EDUCATION | Frontend Development

Jensen | 2021

BACHELOR'S DEGREE | Interaction Design

Stockholms University | 2018

BACHELOR'S DEGREE | Clinical Dietitian

Uppsala University | 2018

SINGLE COURSES

Programming with JavaScript, HTML and CSS – Programming and problem solving with Python – Introduction to Java
– Introduction till eHealth

PERSONAL APPROACH

I care about details, especially when they affect accessibility and long-term maintainability. I am naturally curious and enjoy understanding both the design intent and the technical constraints behind a product. My background in healthcare shaped how I approach collaboration and user needs, with empathy and structure.
